Received-02.11.2020, Revised-27.11.2020

**Abstract:** Studies were conducted to find out the effect of Integrated Nutrient Management on various economic aspects of Gladiolus. It was observed that treatment containing 75% RDF + 25% Vermi-compost + *Azospirillum*+ PSB was found best treatment with reference to Gross income, Net income and B: C ratio during both the years of investigation. Therefore, it is recommended that INM approach with treatment consist of 75% RDF + 25% Vermi-compost + *Azospirillum* + PSB may be recommended for obtaining the maximum profit for the commercial cultivation of gladiolus crop.

**Keywords:** Gladiolus, INM, Profit
